

## **GRADUATE GEO-ENVIRONMENTAL CONSULTANT**

We have an excellent opportunity for a graduate trainee to join our Geo-environmental Division. You will be based in the Nottingham office and be part of our 2010 graduate intake. This is a great opportunity for someone who is looking for a challenging and varied role.

### **The Company**

BWB Consulting is a leading UK Integrated Engineering and Environmental Consultancy that delivers multi-disciplinary engineering solutions to the property, development and construction industry.

Our Geo-environmental Division are a team of highly qualified individuals with extensive experience in the geotechnical and environmental engineering disciplines. The division works either as part of multidisciplinary BWB project teams or independently for a range of key clients. It strives to provide timely and cost effective consultancy services to the development and property sector on projects of any type or size

### **The Role**

You will work both in the office and on site where you will be given early responsibility and the opportunity to contribute to both large complex projects as well as small specialist ones across the company. You will work alongside skilled and experienced colleagues on projects where your involvement and contribution will be actively encouraged.

### **Key duties are as follows:-**

- To carry out Phase I Geo-environmental desk studies.
- To design, specify, procure, supervise and interpret intrusive ground investigations.
- To liaise with internal and external clients to provide geotechnical and environmental support and advice.
- To review and check the work of others in accordance with the BWB Quality Management System.

In return we offer entry into an industry experiencing high growth, valuable experience and opportunities to learn and experience many aspects of brownfield redevelopment. We also recognise the importance of personal development and actively promote CPD.

### **The Person**

The successful candidate will:

- Have a recent qualification to MSc level (or equivalent) in a geotechnical or environmental related discipline such as civil engineering, geology, engineering geology, physical geography or environmental science.
- Have excellent written and verbal communication skills and excellent interpersonal skills.
- Be highly motivated and adaptable with a solution orientated approach.
- Have a full (clean) driving licence required preferably with own transport available for site visits.
